

MCGLOBAL SOLUTIONS NEWSLETTER

April 2026

From the team

It's been a busy start to 2026. We've been heads down on some new work, attending industry events, and continuing to support our customers across the UK and Australia. We wanted to take a moment to share a few updates, including a **first look at something we've been quietly building.**

AssetVIEW DASHBOARD KEY CAPABILITIES

- **Live data visualisation** across asset and work order performance
- **Return on Loss (ROL) status tracking:** open priority, ROL WO count, open periods, and work order notes, in a single view
- Integration with **multiple data sources**, including **legacy CMMS and EAM systems**
- An optional **AI insights layer** for job criticality analysis and performance improvement recommendations

Smarter visibility for your maintenance operations

One of the **most consistent challenges** we see across asset-intensive organisations isn't a lack of data, it's a **lack of clarity.**

We've been developing a new **DASHBOARD** that connects directly to your **existing CMMS, EAM, or other data sources via API.**

No system replacement required. It's designed to surface the operational picture your team actually needs, in a format that supports faster, more confident decisions.

LATEST THINKING:

What your maintenance schedule reveals about your organisation's risk appetite

A deferred PM rarely feels like a risk decision in the moment. But at its core, that's exactly what it is: a trade-off between short-term operational continuity and a higher probability of equipment failure.

The problem is that it's rarely made explicitly, with the full picture visible to the people who should be making it.

Company news:

- We recently implemented a successful **Ultimo EAM** system, for **AIRBUS Australia**, a project we're proud of and will be sharing more about in the coming months!
- We're also looking forward to connecting with the industry in person this year. The team will be at
 - **Food+Beverage Engineering in Derby in June**
 - **Mainstream Melbourne August 2026**
 - **Australian Manufacturing Week in Brisbane May 2026**

As always, if anything here resonates, or you want to talk through what it means for your operation, we're easy to reach.
