

MCGLOBAL SOLUTIONS NEWSLETTER

JULY 2026

2026 is flying by, and with it MCGlobal is constantly working with new customers, advancing and developing new systems, and partnering with new and modern systems!

We're very excited to officially announce our partnership with *Limble CMMS*!

New Partnership!

MCGLOBAL
SOLUTIONS

Combining over 20 years of experience, with modern technician centred technology. Bringing Limble CMMS to the UK and Australia

**What makes
Limble CMMS
stand out:**

Tailor your maintenance processes for maximum efficiency

Built for maintenance professionals

A CMMS your technicians will embrace

Limble CMMS Key CAPABILITIES

- **Mobile-first work orders:** Technicians manage and action jobs from their phone, in real time, with minimal training
- **Automated preventive maintenance:** Schedule by date, runtime, or asset condition so nothing gets missed
- **Full asset visibility:** Every piece of equipment with its own digital record, history, and costs
- **Simple inventory management:** Parts tracked and reorder points set before a breakdown forces the issue

LATEST THINKING:

The contractor visibility gap: Why third-party maintenance work is where compliance breaks down

A significant proportion of maintenance activity, specialist inspections, OEM-required servicing, and statutory compliance checks is **performed by third parties**. And in most operations, that work **doesn't live in the same system** or carry the same visibility as the maintenance done by the in-house team.

That gap is where **compliance tends to break down**.
